Manufacturer of  
Quality Swimming  
Pool Kits,  
Vinyl Liners and  
Pool Covers

2024 BROCHURE

# Steel

PoolWerx® in-ground steel swimming pool panels are custom crafted from 14 gauge G-235 galvanized steel, giving you the strongest panel available. The panel features a full five-inch top flange on both the straight and curved walls in lengths up to 6'. Vertical supports, approximately every 2'-6" and our large horizontal supports provide the most stable panel available. All of our bracing systems are constructed using the same strong steel as our pool panels.

Our technologically advanced manufacturing process allows us the ability to create the most custom of designs. Your custom design can be as simple as mixing features from two or more of our standard shapes or it can be totally unique. **CUSTOM is STANDARD at PoolWerx®.**

Our Clinch Lock panel fastening system keeps the galvanized coating intact protecting against rust and corrosion. The ends of each panel are recessed allowing for a seamless connection between panels, which provides a smooth, clean wall line. All of our wall panels are pre-shaped at the factory to ensure the most accurate pool shape possible each and every time. Our steel wall panels and Clinch Lock fastening system features a Limited Lifetime Warranty.

# Mesh Pool Cover System

- All covers feature a Limited Lifetime Warranty with Five-Year Full to be free from defects in workmanship - The BEST warranty in the industry!
- Full continuous Premium Webbing on both TOP and BOTTOM of the cover.
- Chafing strips (Protective rub strips) are 24" long and cover the full width of our webbing. They are sewn around the perimeter of the cover. Additional chafing strips are placed where needed.
- Special polyester thread treated with UV protection is used throughout the cover.
- All covers include Low Profile Commercial Grade Double Springs with D-Ring and Spring Covers for faster installation. Stainless Steel Buckles are also supplied standard with each cover.
- PoolWerx covers meet or exceed ASTM Standards.

## Standard Mesh Covers

- Drains standing water and melted snow/ice faster than the High Density Mesh Covers.
- Lighter weight.

## High Density Mesh Covers - Tighter Weave

- Reduces sunlight penetration which lessens algae growth.
- Allows for later openings and/or earlier closing of the pool.

Canadian Owned Operation.

Service is Paramount!

**We offer a wide range of pool accessories through our dealer network including:**
